Hello,

My family and I have serious concerns about Sio Silica. We are a family of four who reside within the Municipality of Springfield. My husband and I grew up in this area and returned to raise our family.

We are opposed to an untested process being used and risking the protection of our most valuable water. This process risks the possibility of contamination to the water. We need to protect this environment both above and below ground. Including our wildlife who live there. What protections are actually going to be in place and full supported if/when serious problems arise. There are already places in this world where the water has been ruined and become un-drinkable with plans probably presented just like this company has. All lives that rely upon this water supply will be affected.

Thank you for listening,
Richard, Nicole , Alex & Amber Evans
