ATTN: Cathy Johnson

We as farmers live, breathe and
check our farms = soil, air,
environment, water and lifestyle.

How many more govt regulations do
you think we have time to include
in our daily chores and jobs.

Farmers feed cities... putting a
hold on new farms will end up
harboring your cities. We soil + water
sample + file them yearly... how
many city dwellers + golf courses do that?

Rules can help or hinder a
society... what do we want us to do and
when are we to spend the time + money.
