Rob Matthews
Manager, Water Use Licensing Section
Manitoba Conservation and Water Stewardship
Box 16, 200 Saulteaux Crescent
Winnipeg, MB R3J 3W3

Dear Mr. Matthews:

In the Commission's review of materials associated with Manitoba Hydro's request for a final Lake Winnipeg Regulation Water Power Act Licence, some questions arose regarding the department's responsibilities and procedures.

Questions that have arisen are:

- Realizing that this situation has not yet happened, what procedures and/or operational imperatives would be put in place should Lake Winnipeg go below 711 ft. asl?
- Is there an on-going compliance monitoring program and how is it managed?

Thank you in advance for your assistance.

Sincerely,

Terry Sargeant
Chair
