To whom it may concern
I am against Manitoba Hydro
having the right to control water levels
on Lake Winnipeg, Hydro, as far as I
am concerned is doing it now, look at
Lake Mon, the fairford river is wide
open, yet Lake Mon is not dropping,
we never had this problem 30 years
ago, as my dad controlled the water
at Fairford R., as per water conservator
would phone & tell him how my hog
& what Bay to open up or close, now
we have major flooding, because the
Hydro & Manitoba government decides how
high or lower water levels should be,
is Manitoba Hydro going to pay compensation
to the people who are flooded due to
their controlling the water levels?

Yours Truly
Gerald Fotty
